DETAILED ACTION

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 16-47 and new claims 48-50 are rejected under 35 U.S.C. 103(a) as being unpatentable over Laustsen in view of Gritzner and Margolis applied as of record for reasons of record.

Response to Arguments

Applicant's arguments filed 2/24/06 have been fully considered but they are not persuasive.

Applicants argue that the combination fails to disclose the production of dissolved blood clotting protein recovered in step (e) or claim 16 by citing a portion of Gritzner, which shows the precipitation of the fibrinogen outside the cell.

The fact that the precipitation occurs outside the cell, shows that before precipitation the fibrinogen would be dissolved within the solution and thus would meet the claimed invention.

Applicants further argue that the newly presented claims recite specific membranes with the separation of the blood proteins as well as the pH, which would not be obvious over the combination of the prior art references.

The Laustsen patent discloses a variety of membranes used in electrophoresis as well as disclosing that one having ordinary skill would select based upon the material being separated. The Gritzner patent shows the separation of blood proteins by electrophoresis.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the disclosure of the Laustsen patent with the teachings of the Gritzner patent, because the Gritzner patent teaches the use of electrophoresis to separate blood proteins.

Applicant has pointed out the deficiencies in each of the references. However, the rejection is based on the combination of references. The test of obviousness under 35 U.S.C. §103 is not the express suggestion of the claimed invention in any or all of the references, but what the references taken collectively would suggest to those of ordinary skill in the art presumed to be familiar with them. *Ex parte Obiaya*, 227 U.S.P.Q. 59 BDAPP (1985).

Further the pH of "about 7" would read upon the pH of 6.35, since this is about 7.

Accordingly, the claims stand rejected.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

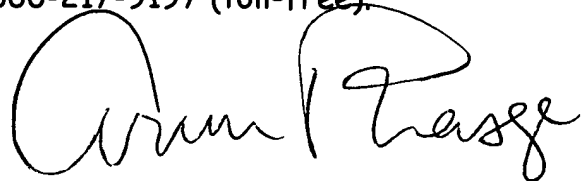

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
